ASSN website review memo

Executive review | 25 October 2026 | Decisions before public launch

The concept now uses the 2026 conference report for event highlights, attendance figures, executive officers, trustees and editorial leadership. The public copy uses explicit placeholders for information that requires approval.

1 Confirm identity and leadership

Confirm the founding year and short history. Review the proposed mission and vision now on the concept website before adopting them. Confirm the spelling and affiliations of all office holders, including Vice-President I. Supply the President's portrait and approved welcome message, plus approved leadership photographs.

2 Resolve the conference report details

The overall dates are 6-9 September 2026, but the opening-ceremony paragraph says 7 September 2025. Confirm that year before publishing a detailed daily chronology. Verify the fellowship recipient listed as Mr. O.O. Ayoola against the official award list. The report also has a parenthetical institution error beside NIHORT. These uncertain details were omitted from the event summary.

3 Approve membership and governance details

Provide fees, dues by category, payment instructions, application destination and approved benefits. Confirm whether member journal discounts and conference rates apply. Approve the application form before enabling collection. Reconcile the Financial Secretary role with the constitution's NEC composition and confirm the constitution's adoption status.

4 Confirm journal and conference plans

The supplied cover is Volume 6, No. 1 (2022); it is labelled by year rather than presented as the latest issue. Supply any newer cover, current issue, approved scope, review policy and timeline, fees, editorial roster and any current call for papers. Confirm the next conference/AGM date, venue and theme. Provide approved 2026 photographs and any final public communique.

5 Supply public contacts and launch arrangements

Approve a general association email, telephone, official social pages and precise secretariat directions. Confirm partners and obtain permission before displaying their logos. Confirm permission to publish the supplied fellows photograph, and verify names before adding a left-to-right caption. Use only verified membership or geographic statistics; the displayed total of 90 participants refers specifically to the 2026 conference.

Confirm an association-controlled domain, hosting owner, access policy and maintenance responsibility. Before launch, test phone navigation, downloads, external journal links, contact routes and any future form submission or payment workflow. Internal conference finances remain outside the website.
